Highlights

Trump's America Could be Good for Bitcoin

- In 2019, a record 55% of Americans were invested in the stock market—the highest proportion since the Great Depression.
- Considering new tax incentives in response
 - Boosting stock market
 - Encouraging americans to buy stocks and shares
- Household income to become tax free dependent on new criteria
 - Investing outside of a traditional 401k plans
- *“...centers on creating “universal savings accounts,” funded tax-free. Any accumulation of profits during the investment timeframe, known as capital gains, would not be taxed,” - Larry Kudlow, director of the US National Economic Council*

Series A to Fund UK Custodian in Overseas Expansion

- Copper's Series A featured two well known venture firms LocalGlobe and MMC Ventures
- Expansion eyes Asia and North America as feature enhancing facility environments
- *“This venture funding round is a real vote of confidence from investors. Their support will allow us to accelerate our scale up, hiring teams in key regions and introducing new products and services to better meet their needs.” - Dmitry Tokarev, CEO of Copper*
- Provides a “walled garden” solution to the industry
 - Institutional trading for clients that can range from private traders to financial institutions
 - Previously this was unmet by the many custodian services. The infrastructure simply doesn't exist
- Monthly trading volume of \$500 million

Notes

Alt coins are up. Will have update on trade backs for Monday, but these are all the stakeable coins I mentioned a few weeks back. Also apparently we hold XRP...

- NEO
- TRX
- THETA
- XTZ

Questions for Chat Bot

Basic Attention Token?

- Basic Attention Token is an open-source exchange platform built on the Ethereum blockchain. It's main use-case has been decentralized advertising. Through it's proposed system, users are actually paid for their attention. With their website browser that mimics Google Chrome (Brave Browser) usability is widely used in the blockchain community.

Cambridge Analytica?

- 2019 scandal in information technology. British consulting firm that wrongly combined the digital assets of countless individuals without their consent. By leaking the ownership of these illegally obtained assets during the electoral process, they drew worldwide attention to their action.

Digital Wallets?

- These asset holders enable their users to store, transact and pay funds via the computer. The software tracks the transactions and often communicates with banking systems. Examples are Paypal and Alipay

Cryptojacking?

- Unauthorized use of your device or computer in an act for the cybercriminal to syphon the digital assets held by said user.

Art House Enlists Blockchain Tokens for Funds

- **Esquina de Abula**
 - arts center in Miami using blockchain tech
 - The Alapatta (neighbourhood) hotspot is known for its unique stay requirements
 - Artists paint a mural at the location in exchange
- **Business Model has made a need for additional wall space**
- **Due to financial constraints, they've enlisted blockchain as a means to crowdsource**
- **Funds go to supporting local arts center**
- **Pieces are tokenized as they can be replaced by another artist very quickly**
 - Tokens are unique coins running on the Bitcoin blockchain
 - "People would buy this token for the same reasons someone might buy a print or any other rare collectible. It just happens that this rare collectible is an asset on the blockchain, instead of a piece of paper or a ceramic wall plate," -

Art Rozenbaum

- **Tokens locked at 1 million PRECOLOMBIANS**
- **Soft launch at Art Basel on December 8th**

Moneygram Cuts XRP for Visa

- **FastSend is a service to use the Visa Direct Original Credit Transaction system**
- **Ripple had previously purchased a \$50M stake in MoneyGram**
 - Speculation suggests that it was due to knowing they'd joining with XRP
- **Previously compared to the Libra deal at the time it was made. Now looking less likely to hold up**
